ARC-1250i[™]

STUD WELDING POWER SUPPLY

DESCRIPTION

The ARC-1250i is a compact, lightweight and portable stud welding power supply capable of welding studs up to 5/8" diameter full weld base. The fully regulated power supply uses inverter technology and digital controls, and produces a smooth, stable welding arc. Both the weld time and weld current are continuously adjustable for precision and repeatability. Extremely small and lightweight, the power source weighs only 79 lbs.

SPECIFICATIONS

DIMENSIONS: 18H x 11W x 27D
WEIGHT: 79 LBS
OUTPUT: 50-1250 AMPS, REGULATED
 0.01 TO 1 SECONDS
DUTY CYCLE: 5/8" STUD - 6/MIN
INPUT: 400V, 50HZ AND 460V, 60HZ, THREE PHASE
FUSING WITH 30AMP @ 460V, 60HZ @ RATED OUTPUT
TIME DELAY 40AMP @ 400V, 50HZ @ RATED OUTPUT

SYSTEM COMPONENTS

ITEM	DESCRIPTION	PART NO.
SYSTEM	STANDARD DUTY, 400/460V	100-0229
POWER SUPPLY	400/460VAC 50/60 HZ	200-0042I
WELD GUN	STANDARD DUTY W/ DAMPENER	300-0801
COMBO CABLE	1/0 x 50'	125-1000
GROUND CABLE	1/0 x 25' AND CLAMP	125-0102

OPTIONAL

ITEM	DESCRIPTION	PART NO.
Gas Module	Gas delivery system	222-0001

FEATURES

- *Portable
- *Step-less Weld Current and Time Adjustment
- *Precise Digital Control
- *Gun Short Circuit Protection
- *Ultra-Smooth Constant Current output
- *Heavy Duty Thermal Protection
- * Full One-Year Warranty
